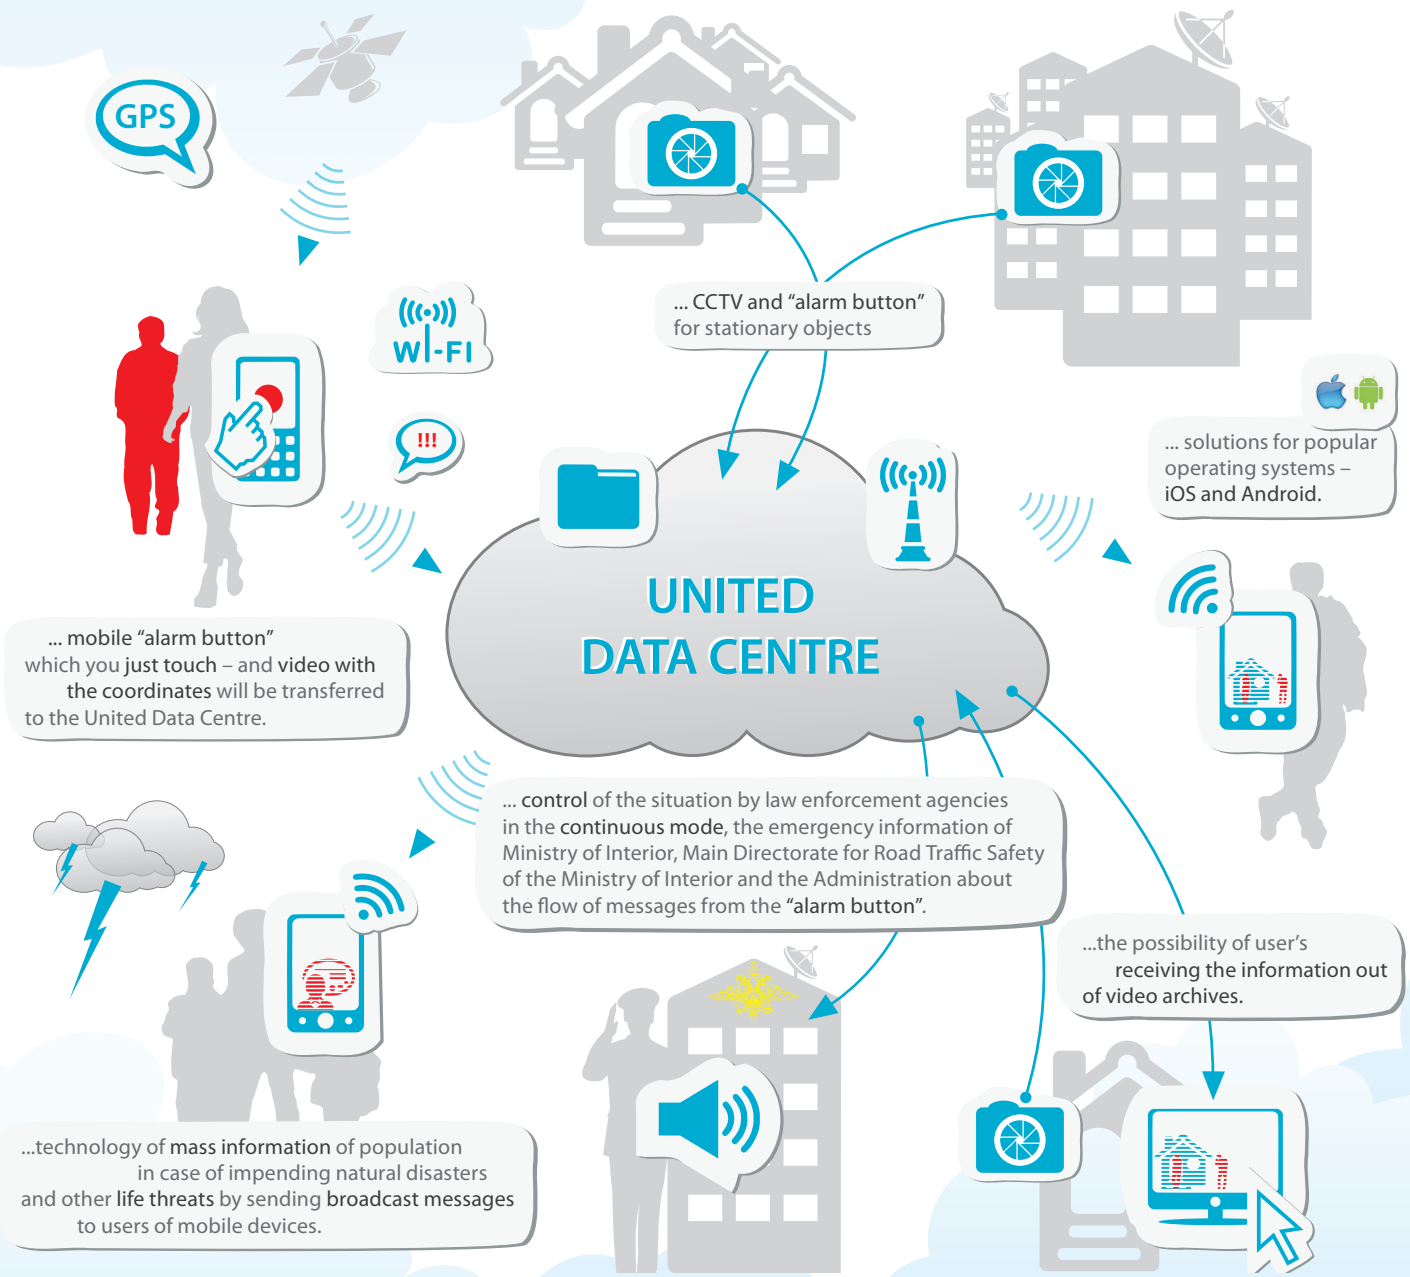
CAIS SAFE CITY is...

… CCTV cloud solution with the using of modern virtualization technologies.



CAIS "SAFE CITY"

Complex automated information system "Safe city" based on mobile and cloud technologies.

PECULIARITIES OF THE SYSTEM

- *the use of modern virtualization technologies for constructing a United Date Center (UDC) that provides the collection of video streams from numerous cameras, the formation and the storage of archives and their availability to end users*
- *the use of mobile technologies for effective communication «citizen-police»*
- *dedicated jobs of monitoring in the city Administration, Police departments and Traffic police departments*

OPPORTUNITIES OF THE SYSTEM

- *providing the access to real-time video streams and archives through a web portal*
- *automatic receiving of information from special services of the city*
- *a unique subsystem «mobile alarm button» for smartphones based on iOS and Android which provides automatic transmission of alarm signal from the user, his coordinates and video stream from a camera of his mobile device to the Police*
